Eex

Design Simone Viola

Materials Polypropylene/plywood, nylon, metal

X. A sound, a symbol, a meaning. All enclosed in a shape that is always recognizable by its intrinsic, essential stability. Rather than the mathematical variable, our reference is to the very archetype of a supporting structure, just like a circle would stand for a wheel.

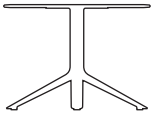

Eex presents a collection of contract tables that also have a certain vocation for domestic contexts, with square or round tops available in two heights and suitable for different uses: either as side or dining table, in the black,

white or cool gray finish, in which plastic and metal components blend into a single colour. The top has no sharp corners or edges, and its shape is further emphasized by a light, elegant outline. A soft, rounded shape that lets water drops and dew slip away, free of any grooves and unnecessary decorations, ideal for practical and comfortable use. The simplicity of its iconic shape allows for a perfect combination with all of the TOOU seats, creating ideal solutions both for indoor and outdoor applications.
